

gaged by a fork-like operating member  
in the camera with which the spool is to  
be used.

5 2. A spool according to Claim 1, char-  
acterised in that the rectangular or like  
non-slotted stud is mounted on a circular  
plate for the purpose specified.

3. The improved spool for photographic  
films substantially as hereinbefore de-

scribed with reference to the accompany- 10  
ing drawings.

Dated the 6th day of June, 1935.
